Dolls (Shire Library)

Caroline Goodfellow : Dolls (Shire Library) before purchasing it in order to gage whether or not it would be worth my time, and all praised Dolls (Shire Library):

2 of 2 people found the following review helpful. Small But Mighty!By Sandra IlgenThis book is small... short... but very much to the point! Even if you think you know everything about dolls, there is something here for you to learn. I suggest this to every serious doll collector, and especially those who are just starting out.

Dolls are one of the most popular subjects for collectors. A collection does not have to consist of antique dolls or ones of great value. Many collectors start by inheriting a doll or by buying one that happens to catch their eye. Dolls have a very long history and were produced in many countries. Not all were made as playthings, but many of those collected

today were toys. A concise history of the doll industry over the last 300 years in Europe, the United States and the Far East. It shows how dolls have developed and will be a useful guide to all who enjoy dolls, whether they collect them or not. Typical examples of dolls from each area are illustrated, together with a number of rarities.

About the Author Caroline Georgina Goodfellow is the retired Curator of Dolls and Toys at the Museum of Childhood, Bethnal Green, London. She has studied dolls for many years and is an established international guest lecturer.
