[Library ebook] Egyptian Scarabs (Shire Egyptology)

Egyptian Scarabs (Shire Egyptology)

Richard H. Wilkinson : Egyptian Scarabs (Shire Egyptology) before purchasing it in order to gage whether or not it would be worth my time, and all praised Egyptian Scarabs (Shire Egyptology):

0 of 0 people found the following review helpful. uhhBy BI think this was mostly words, without many pictures. I got it for the pictures of scarabs. Blah. Maybe someday I'll read it.1 of 1 people found the following review helpful. Very good book for beginners.By Ernest A. KrumbeinAll of the Shire books I have seen have been quite educational and nicely done.This book is in that catagory although it is for a beginner in collecting or studying scarabs.Very informative.

The scarab is the single most abundant artifact to have survived from ancient Egypt and hundreds of thousands, if not

millions, were made throughout the course of Egyptian history. Today, scarabs continue to be found on excavations throughout Egypt and thousands reside in museum collections around the world. This volume examines these ubiquitous and important artifacts by first considering the unique biology and behavior of the scarab beetle and its incorporation into Egyptian symbolism, religion and art. The development of the scarab amulet is then considered, and the many types of scarab produced by the Egyptians are surveyed. Two particularly important classes of scarab - the heart scarab and the commemorative scarab - are examined in detail. Finally, the export of Egyptian scarabs and their imitation by the nations around Egypt is examined as a tangible mark of the extent of Egypt's influence in the ancient world and of the importance of the scarab itself.

About the Author Richard H. Wilkinson is Professor of Egyptian Archaeology at the University of Arizona. He has organized and directed several exhibitions and international conferences on Egyptological topics. Dr. Wilkinson is the author of over a hundred articles and reviews as well as seven previously published books. He also founded and edits the Directory of North American Egyptologists and has served for two terms on the national board of the American Research Center in Egypt, the official Egyptological association of the United States.
