(Download ebook) EM38 British Military Respirators and Anti-Gas Equipment of the Two World Wars (Europa Militaria)

## **EM38 British Military Respirators and Anti-Gas Equipment of the Two World Wars (Europa Militaria)**

**Thomas Mayer-Maguire, Brian Baker : EM38 British Military Respirators and Anti-Gas Equipment of the Two World Wars (Europa Militaria)** before purchasing it in order to gage whether or not it would be worth my time, and all praised EM38 British Military Respirators and Anti-Gas Equipment of the Two World Wars (Europa Militaria):

0 of 0 people found the following review helpful. This is great for the ModelerBy Customerthis is a out standing series of book by crowood publishing. It well fit in my library . This is great for the Modeler, Historian..

Poison gas was one of the most fearful weapons of its day and added a terrifying new dimension to modern warfare. In 1915, the only item a soldier had to protect himself from the harmful effects of gas was a shell dressing, soaked in his own urine and then tied around his face. By 1918, the British Army had developed a range of innovative protection methods that heralded the birth of the modern day military respirator. Throughout both World Wars, Great Britain led the way in developing anti-gas technologies. Today, items such as respirators and anti-gas equipment are highly sought after by the enthusiast. What the collector lacks is information and reference photographs of such items, and he also has little information available to him on topics such as preservation, manufacturer details and safety aspects of handling these items. This book aims to provide a useful, full-colour reference guide for the discerning collector and for all students of militaria, as well as providing a brief history of the development of gas warfare and equipment.

About the Author Thomas Mayer-Maguire has been extensively involved in First and Second World War Living History for a number of years, having presented many educational displays across the country. Tom helps to run the Tommy Atkins Historical Society, a Living History group based in the Midlands. Both authors have always had a keen interest in anti-gas equipment and military respirators. Brian Baker has been extensively involved in First and Second World War Living History for a number of years, having presented many educational displays across the country. Brian is the founder of Doing our bit, a historical group regularly doing talks for local schools around Leicestershire. Both authors have always had a keen interest in anti-gas equipment and military respirators.
