HooverI teach interior decorating to those not interested in getting into the profession: Home owners, renters, and teens. This book is the best I have seen on this topic! Well organized by the different classifications of country style. Styles of Europe, the U.S. and Canada are included. Very well illustrated (as one of my past students commented, "I need a picture book" to understand style. Don't we all. And this book will certainly make my job a lot easier.0 of 0 people found the following review helpful.
