European Clocks and Watches: in The Metropolitan Museum of Art

Clare Vincent, Jan Hendrik Leopold, Elizabeth Sullivan : European Clocks and Watches: in The Metropolitan Museum of Art before purchasing it in order to gage whether or not it would be worth my time, and all praised European Clocks and Watches: in The Metropolitan Museum of Art:

1 of 1 people found the following review helpful. A wonderful catalogue of a great exhibitBy cybered27This book is a wonderful catalogue of a great exhibit. I saw this exhibit at the Met in NYC. It is extremely interesting and the pieces are quite beautiful. This book does justice to all of it.0 of 1 people found the following review helpful. GREAT HOROLOGICAL BOOKBy Philip PriestleyIMPORTANT BOOK.

The first detailed discussion of the greatest timepieces from the exceptional collection of The Metropolitan Museum of Art Among the worlds great technological and imaginative achievements is the invention and development of the timepiece. Examining for the first time the Metropolitan Museums unparalleled collection of European clocks and

watches created from the early middle ages through the 19th century, this fascinating book enriches our understanding of the origins and evolution of these ingenious works. It showcases 54 extraordinary clocks, watches, and other timekeeping devices, each represented with an in-depth description and new photography showing the exterior as well as the inner mechanisms. Included are an ornate celestial timepiece that accurately predicts the trajectory of the sun, moon, and stars and a longcase clock by David Roentgen that shows the time in the ten most important cities of the day. These works, created by clockmakers, scientists, and artists in England, Germany, France, Italy, and the Netherlands, have been selected for their artistic beauty and design excellence, as well as for their sophisticated and awe-inspiring mechanics. Built upon decades of expert research, this publication is a long-overdue survey of these stunning visual and technological marvels.

"nothing if not comprehensive exhibition and book focus not just on mechanics but also on the decorative arts that made these timepieces as beautiful (and complex) on the outside as they are on the inside. Shannon Adducci, Introspective: The 1stdibs Magazine, 2015 Holiday Book Roundup
