This volume studies, in chronological order, three types of large clocks-wall, cabinet and free-standing, with particular attention to clocks from France, England, Holland, Scandinavia and the German-speaking countries. The emphasis is on French clocks due to recent great interest in the trade of these among collectors. The English clocks, still favored by a large group of collectors, are strongly represented here and there are several beautiful examples from Holland. The German speaking area, including Austria, Germany, and Switzerland are also well represented especially with clocks from south Germany-a delight for lovers and collectors of the Baroque and Rocco clocks. European Pendulum Clocks is essential for the collector of clocks, dealers, auction houses, museums, and anyone awed by the beauty and

craftsmanship of these fascinating timepieces.
