Long awaited work!By Tasha IngallsGift for husband at Christmas, he has been looking for a book of this type for a long time, so was extremely pleased to receive it. Spent many hours looking at pictures and reading informative articles.1 of 1 people found the following review helpful. A flood of fans - great reference materialBy K. MaxwellThis is really a picture book, but it will be an essential reference for collectors of advertising fans. The book contains two collections and each fan has been photographed on both sides in colour and given an approximate worth value in the marketplace. The fans are then divided into categorizes such as: Agriculture, hotels motels, restaurants, ships and wine etc.The authors haven't managed to collect every advertising fan ever made (I can spot a few notable exceptions from my own experience) but this book is packed with art nouveau and art deco

fans - more than I've ever seen in any other book - and it makes it a great reference for collectors.

Over 1750 photos present more than 1550 fans in all their artistry, some showing both sides. The informative descriptions of the fans are often amusing. Roughly 100 factoids in boxes accompanying the captions, give readers extra insight into these fascinating fans. The fans are divided into forty-three categories, from Agriculture to Wine. The gorgeous fans of casinos, expositions, hotels, railroads, and theaters are amazing. The delightful fans of the circus are an interesting contrast to the somber fans of funeral parlors. Fans advertising chocolate and other sweets, beer, Champagne, cool drinks, and spirits will pique your appetite for advertising fans. The authors are from different sides of the Atlantic so they were able to amass a dazzling array of fans representing Europe and North America, plus a handful from other locations. Two indexes show the wide variety of fans by artists as well as manufacturers and suppliers.
