Pictures and details!

Until it suspended major glass production in 2011, Fenton Art Glass was the oldest extant American glass company, having reached its centennial year in 2005. For more than a century, this family-owned business produced glass in an astonishing array of shapes and colors, including the figurines of various animals, birds, and butterflies featured in this book. Glass figurines have achieved iconic status in American culture, but the Fenton animals are not the delicate spun-

glass creations of the famous Tennessee Williams play. They are a different kind of glass menagerie altogether! Heavy enough to use as paperweights, they serve as a canvas for colors and decoration ranging from the sublime to the whimsical. This book takes the reader on a tour of that amazing world of glass honoring the beasts, birds, and bugs that are so essential a part of our natural world and our human lives.

About the Author Peggy Whiteneck comes from a family of antique collectors. She has her own collection of Fenton Art Glass animals and birds and has done extensive research on these figurines. Whiteneck is also the author of *The Collectors Book of Retired Lladr* (Spanish porcelain figurines) as well as a poetry collection, *From These Earthly Parts*, both available from Old Line Publishing. She is currently at work on another Fenton book, also forthcoming from Old Line Publishing, on the small, Victorian-form candle lamps Fenton called fairy lights.
