Like anyone else who enjoys the thrumming sounds of a happy workshop, following plans is a soothing process with a satisfying result. But getting an idea into my head (and then trying to make it real) is more frustrating - my life lacks the spare 'dream time' needed.

As a substitute, I like to look at the work of others. And Taunton Press's series of design books is a fine place to start.Each book is like a juried shop with some 10,000 original entries. There are sections on cabinets, chairs and

benches, tables, boxes chests, desks, beds furnishings, sculpture carvings, turnings, and accessories musical instruments. Some 266 individual pieces are presented. While the pieces will appeal differently to different individuals, they all remarkable in some fashion and invited serious thought on possibilities and techniques. The range of style and approach presented is wide. There is everything from the ultra-modern to the ultra-traditional, from traditional furniture to sculpture and toy. One of my favorites is the clean lines of Jay Bonaventura's dining chair, that seem echo Arts Crafts without ever becoming that style. Another is a deceptively simple sideboard by Michael Hoffer.

And then there is the jaunty enthusiasm of a Randy Morris clock. I hope one day that a piece of my work merits appearance in a publication like this. Not likely, but with such good sources of inspiration, you never know. 0 of 0 people found the following review helpful. Really neat designs By Jerry D. Lyon I have purchased tons of book to try and find something difficult to make, something challenging, and cannot find anything too tough. I decided to just try and find things to spark my interest and imagination to design and build. The whole series of these books are incredible. There are so many things to try and build that are challenging in there, and a ton of ideas.
