## **Firearm Blueing and Browning (Stackpole Classic Gun Books)**

**R. H. Angier, Ned Schwing : Firearm Blueing and Browning (Stackpole Classic Gun Books)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Firearm Blueing and Browning (Stackpole Classic Gun Books):

4 of 4 people found the following review helpful. Useful, outdated, overly wordyBy The Great GadflyThis book contains a lot of good information, but most of it is outdated, calling for chemicals that are next to impossible to obtain today. Like most old do it yourself books, it makes too much use of words and not enough use of pictures. If you want to put a good, slow-rust bluing on a metal surface, simply buy and follow the instructions for Laurel Mountain Forge's

solution. 1 of 1 people found the following review helpful. Excellent information  
By autumn wolf My husband received this book for Christmas, and said it has everything you need to know. 1 of 1 people found the following review helpful.  
Blueing and Browning Reference  
By FHenderson This book came highly recommended as reference material and it has not disappointed. The only reason not to give it five stars is that the print is somewhat small.

Timeless information in an easy-to-use format with a new foreword added Popular and little-known methods explained Includes useful weights and measures charts This practical and precise guide to the chemical and heat coloring of all barrel steels and gun metals covers the earliest soft carbon methods to the latest rustless techniques-- some 230 formulae in all. Also included are ways to remove rust, barrel finishes, and nickel plating by chemical means. It's a classic, comprehensive reference of interest to professional and amateur gunsmiths, restorers, collectors, and shooters alike.

About the Author R. H. Angier was a recognized master arms technician. He lived in England.
