Firearms Lock Designing

Steve Culver : Firearms Lock Designing before purchasing it in order to gage whether or not it would be worth my time, and all praised Firearms Lock Designing:

0 of 0 people found the following review helpful. Expensive for what it is!By Free WalkerThis book is a good place to start if your designing your own lock from scratch, but if you have a few old locks to study you'll learn everything here just as easily. This is quite a hefty price for what is presented.

This book describes a firearm lock designing process, developed by Master Gunsmith and Master Bladesmith, Steve

Culver. Steve developed this method for use in his own shop, to facilitate the designing of flint-locks and percussion locks for the guns that he builds. The information in this book, shows how to design a firearm lock that includes a half cock notch. How to design a fly in a tumbler. Plus other design considerations and choices that must be made during the designing of a firearm lock.
