Flaked Out: The Story of Cod and Newfoundland

C.H. Colman : Flaked Out: The Story of Cod and Newfoundland before purchasing it in order to gage whether or not it would be worth my time, and all praised Flaked Out: The Story of Cod and Newfoundland:

0 of 0 people found the following review helpful. We thoroughly enjoyed reading it and some read it twiceBy Gwen BrickettTHIS IS A COPY OF THE REPORT WHICH I GAVE TO DOROTHY TO SHARE WITH HER NEPHEW C. H. COLMANDear Dorothy,Thank you for sharing your nephews delightful book with us. I have ordered two more copies from . Six adults, three of them teachers, read the book. We thoroughly enjoyed reading it and some read it twice. Four children ages five to eight also read it. We discussed the type of story, remembered some of the history and learned things for the first time.The historical postage stamp present on the book is a unique idea. I think this alone would draw both children and adults to the book. I think more would be interested in stamp collecting after

reading your book. **FLAKED OUT** brought back many happy memories for me. I spent some time in St. Johns Newfoundland in 1987. I enjoyed the cod jigging, eating cod tongue and watching **KISSING THE COD**. As the book states, shortly after that time there was the band on fishing for cod. I don't know if there is a difference between Canadian students and American students and grade level expectations. I feel that books in classrooms with age and grade ratings put the slow reader and the competent reader at a disadvantage when choosing a book. If the books are put in the library everyone can have the opportunity to read them. Gwen Brickett 0 of 0 people found the following review helpful. Favorites By Nancy C. Anderson This is a short, well-written, and very informative book about my favorite fish--cod, favorite hobby--stamps, and favorite subject--history. Great job!!

KIRKUS REVIEW: This second childrens book by Colman (*The Bald Eagles View of American History*, 2006) tells the story of the overfishing of cod off Newfoundlands coast. Colmans tale begins with the northern lands first settlers, the Beothucks, who arrived nearly 2,000 years ago to a bounty of giant fish swimming off the coast. Colman traces the groups of European explorers and fishermen who followed and, in an air of lawlessness and with a lust for cod, developed various advanced fishing techniques. This led to Queen Elizabeths claiming of Newfoundland and encouraging of year-round settlement of the territory. As the animals were fished at younger and younger ages, growing smaller and smaller, laws requiring specific kind of nets were put into effect. Around the turn of the 20th century, the first hatcheries appeared to aid in the repopulation of the diminishing species. Colorful stamps the author has collected since age 5 head each section of the book, depicting scenes, symbols and characters from Newfoundlands history. The rapid and devastating effects of human settlement and consumption take a turn for the better near the end, as we learn that in more recent decades, scientists and the government have taken the helm in the cause of cod. Though the fish are nowhere near the size they were when the Beothucks first feasted on them, their population has been increasing. For readers who want to know more, Colman provides an extensive review of research at the end of the book, where, through a brief, lively narrative, he provides the names of books that go deeper into aspects of cod history that this book sketches out. With its brief, straightforward narrative, Colmans informative book seems to be intended for children, though readers of any level are granted a view of a phenomenon many have likely overlooked. June, 2011 **THE SOUTHERN GAZETTE:** Harold N. Walters (Excerpt) *Philately*. *Philatelist*. Now there are a couple of words you don't get to use twice a week. Not unless you're a stamp collector. C. H. Colman, author of *Flaked Out* [Fancourt Publications] is a philatelist and has been since the age of five when he first dabbled in the practice of philately. [Looka me, I scribbled both words twice! Im the by!] In *Flaked Out*, Colman has combined his passion for philately with his desire to write a childrens book about the history of Newfoundland showing what happens when society fails to control its technology, and how society makes amends. It examines the history of the cod fishery from the time Beothucks scooped cod from the sea until today when efforts are being made to salvage what remains of North Atlantic cod stocks. Sixteen sections of the book open with a picture of a stamp. The first one is a Newfoundland two-cent stamp depicting a bewhiskered cod. In the accompanying text, Colman imagines a giant cod swimming in Newfoundland waters thousands of years ago. Just look: When the giant reached the bottom, it fed, and the whisker of skin that hung from its chin traced a line in the sand. Chin whisker tracing a line in the sand? Thats some size of a codfish, eh bys? Ive said before Im like a youngster when Im reading childrens books, so I get a kick out of fancying that brute of a fish dragging his whisker along the bottom. *Flaked Out* is interesting, not only for the more than a dozen stamps but also for tidbits of codfish knowledge. Tidbit: The pearly stones inside a fishs ears are called otoliths. I didnt know that October 4, 2011 **FOR THE FULL REVIEW VISIT:** southerngazette.ca

About the Author C.H. Colman has collected stamps since the age of five and loves imagining the events detailed in those tiny pictures. He spent six years growing up in St. Johns, Newfoundland. This is Charlies second childrens book. *The Bald Eagles View of American History* was published by Charlesbridge in 2006. Charlie and his family live in Ohio and Ontario.
