Mr Wise gives a first hand account of the maiden flight of Operation Babylift, an evacuation of Vietnamese infants and children authorized by then President Gerald Ford at the close of the Vietnam War. The author gives a heartfelt account of the tragedy, the miracles and the sacrifices made by the many who participated in this humanitarian event. The author brings us along with him, touching on the events that led up to his own personal

involvement as a crew member on the ill fated C-5 Galaxy crash to the tragedy and trauma he endured following it's fall from the sky. The book is an easy read, filled with feeling and as I said, you won't be able to put it down! --"Doc" Bernie Duff0 of 0 people found the following review helpful. A tragic event for so many innocent souls and family members left behind.By JanetI enjoyed every word from cover to cover. My Aunt Barbara Maier was in the cargo section with Philip Wise and was mentioned more than once. There were truths I learned about the crash I did not know.0 of 0 people found the following review helpful. I enjoyed this first person story of the Baby Lift story ...By Pamela A. LoewenI enjoyed this first person story of the Baby Lift story and accident and what happened to others. It was a little disjointed as his story starts and stops, when he inserts other stories in between. But a very good read.
