Nice looking book but info is outdatedBy Shella100Received the book and was excited to look to see if any of the shaker sets I had were in there. I was very disappointed to not see any of them.

The author uses no repeats from her first three editions. Salt and pepper shakers were made by virtually every pottery and porcelain manufacturer in the U.S. This guide contains these manufacturers and more. Over 800 full-color photos, complete descriptions, and of course, current values, make this a welcome new release.
