Sheer Delight: Handwoven Transparencies

Doramay Keasbey : Sheer Delight: Handwoven Transparencies before purchasing it in order to gage whether or not it would be worth my time, and all praised Sheer Delight: Handwoven Transparencies:

6 of 6 people found the following review helpful. inspirational!By AnnaI was not familiar with this form of weaving and bought the book sight unseen. I am so glad that I did! I rarely read a craft book cover to cover but I did this one. It has MANY pictures of woven transparencies and the author gives a detailed description of each method used and how they differ. There are no "cookbook" projects but by studying the information carefully, I feel totally capable of weaving my own transparency. I would recommend this book to anyone who is considering this form of weaving.4 of 4 people found the following review helpful. I was a bit dissapointed because the book covered mostly ...By Barbara LeakeI was a bit dissapointed because the book covered mostly finnished work when I had wanted more explanation on how it was woven1 of 1 people found the following review helpful. Five StarsBy Paul AndrasoI found the book very helpful and the photographs were inspiring.

From the inside dustjacket: If you saw Doramay Keasbey's lovely and colorful transparencies, you'd probably want to weave one yourself. When we asked her to write this book, she asked a large number of very talented weavers in this country and elsewhere for examples of their work. Her efforts were richly rewarded. Dozens of weavers generously supplied her with photographs of their creations. The result is a delight to behold and a source of inspiration for your own transparencies. Besides giving you a gallery of phenomenal work being done in this area today, Doramay's book also explains how to do the techniques involved. A transparency, as you probably know, is woven on a fine warp, with the pattern areas inlaid with a heavier yarn. When mounted in front of a window, the warp seems to disappear while the pattern appears suspended in air.
