By Gypsy Samuels
This will never be a best seller. But it is necessary reading for anyone in the counseling field who works with children with seizure disorders. Art is the best way to reach into the mind of the person and not only feel them but to feel like you understand their processes more clearly in your work.

Excellent book that tell the story of living with epilepsy from the art of artist who suffer epilepsy.

Visions: Artists Living with Epilepsy CD-ROM contains all of the over 200 full-color art reproductions from the book. Each piece of art was created by artists who have epilepsy. The collection not only showcases this artwork, but also celebrates their achievement. Endorsed by the Epilepsy Foundation, this collection should serve as an inspiration to anyone affected by epilepsy.

the most educational, unique book one could hope for. I really recommend this book as all 32 of these brave artists educate through the eyes and ears. an epilepsy forum for anyone searching epilepsy education. -CLEVELAND BANNER (November 2003)
