Volkswagen Beetle (Cars That Made History)

Marco Batazzi : Volkswagen Beetle (Cars That Made History) before purchasing it in order to gage whether or not it would be worth my time, and all praised Volkswagen Beetle (Cars That Made History):

BenedettoAn interesting book on the Beetle ... with a caveat: the book contains a lot of photographs, but the entire collection is in black-and-white only (which is why it only gets four stars); also, the book was written in 1989 -- in Italian! -- and this is the 1991 English translation, so an occasional awkward phrasing creeps in here and there in the text.That much said, I heartily recommend the book for its history of the Beetle and the interesting photo record it provides. I think you'll find it to be a good addition to any library of VW Beetle books.

More than 20 million units of Ferdinand Porsche's "Beetle" were produced from the 1930s to the 80s. This book focuses on the history, technology, and analysis of this famous Volkswagon car. 180 bw photos and illustrations.
