(Read ebook) Watercraft on World Coins: Africa and Oceania, 1800-2011

## **Watercraft on World Coins: Africa and Oceania, 1800-2011**

**Yossi Dotan : Watercraft on World Coins: Africa and Oceania, 1800-2011** before purchasing it in order to gage whether or not it would be worth my time, and all praised Watercraft on World Coins: Africa and Oceania, 1800-2011:

The book is organised as a catalogue of "ship coins" according to the popular KM-numbering system. Coins that have a common design are grouped under separate headings. Included are both circulating coins and collector oriented commemoratives. The coin images represent the many different ways in which the ships are depicted. Volume II included over six hundred narratives, and follows on from the publication of "Volume I -- Europe, 1800- 2005" (2007), acclaimed as a book that should be owned or at least read by every collector of world ship coins.

About the Author Yossi Dotan is a numisnautical researcher, a recognized expert in modern coins depicting watercraft. Since retirement after a 46-year career with a major firm of certified public accountants, he has devoted himself to researching ships and coins, and writing the narratives for this book. He is a contributor to the Standard Catalog of World Coins. In recognition of his non-numismatic volunteer service, Queen Beatrix of The Netherlands has made him a Knight of the Order of Orange-Nassau.
